The vineyards soils are of great importance, being very active with good biological conditions which favour a fast assimilation of reincorporated organic material. This enables a full terroir expression.

### WINE-MAKING

Skin contact prior to the fermentation to increase the extraction of aromas and texture. Gentle pressing to obtain the free-run juice. After that the must goes through fermentation at a low temperature of 13-14°C, followed by an ageing of the wine in the tank with its fine lees for 2 months with weekly stirring-up of the lees to add complexity.

### TASTING NOTES

A bright, clean, straw-yellow colour. Very aromatic in the nose, fresh and with notes of white flowers, citrus and apricot. In the mouth it is pleasant, with good acidity, complex and with a creamy touch. It is rich and with a long afertaste.
